(54) Title: CONVERTIBLE HAIR ROLLER

(57) Abstract: A device for curling hair. The device comprises a flexible member, a fibrous material and a plurality of hook-type fasteners. The flexible member has a first position, which is straight and semi-rigid, and a second position, in which the flexible member is curled upon itself. The fibrous material borders the flexible member. The hook-type fasteners are attached to the fibrous material such that the fibrous material is between the flexible member and the hook-type fasteners.
